ObjectARX or ObjectARX.NET is an open source, C++ class library. It is used to create plugins for Autodesk applications such as AutoCAD, Revit, Autocad LT, Architectural Desktop, Project Managers, etc. A more recent major update is AutoCAD 2008. On the Windows platform, AutoCAD has COM support to use it as a desktop-based extension. An example of this use is the Autodesk 3D Warehouse, that is accessed from AutoCAD R14. Autodesk discontinued development of the AutoCAD application for the iPad, and instead released Autodesk DWF Viewer for iPad in August 2011. Other software In addition to the core AutoCAD product, the company offers various other products and services for a variety of needs. Map3D and Map3D Viewer, share the same functionality as AutoCAD Map 3D, but run in the Windows OS and are built upon a common core. The Map3D Viewer is also available for iOS, and as a 3D Warehouse service. Map3D Viewer is also available as a component of Autodesk Maya 3D Studio. AutoCAD LT, a simplified version of AutoCAD, is released for Windows and Mac OS X. It was introduced in 2001 as a "micro" version of AutoCAD. It is developed in collaboration with the Swedish company VOPUS and is an available hosted product on the Microsoft Technology Center website. Mobile apps AutoCAD Mobile, an iOS version of AutoCAD on the iPad. It has a simplified user interface compared to that of AutoCAD. This is because it is designed to be used as a drawing app, not as a CAD design tool. AutoCAD Mobile Pro, a version of AutoCAD designed for Windows Mobile devices. Keyboards The 2010 Autodesk Autokey comes with three programmable keys. To configure the programmable keys, open the AutoKey section of the Tools menu and select the "AutoKey" option. An AutoKey programmable key for CAD is selected by default. A number of other keyboards have been created by third parties. Many of these are not AutoCAD-compatible. Hardware support AutoCAD 2016 has been known to work with the following: Apple iMac models Apple MacPro models Apple MacBook Air models Apple MacBook a1d647c40b
