one I have used many times and the one I think is the best (by far) is text123 from CodeProject. If you have trouble getting your hands on it, have a look at the forum on the site. Oh, the bad news is that I have never found it OLE compatible (at least not on Windows 2000/XP), though you can try to make it work. . By contrast, if the defendant 4 attempts to withdraw his guilty plea, the court may permit the defendant to withdraw the plea if the court is satisfied that “substantial justice has not been done,” and in some cases the court will permit the defendant to withdraw his guilty plea if it is “necessary to correct a manifest injustice.” Fed. R. Crim. P. 11(d); see also Young, 470 U.S. at 16-17. III.

Concededly, the district court erred in imposing a two-level obstruction of justice enhancement. At the outset,

About Us Open Source Community As an extension of the FreeBSD Project, the FreeBSD Foundation sponsors and encourages the development of a diverse set of free software projects and products. Organizations of all sizes, from universities to large companies, are encouraged to make use of FreeBSD and its related tools. These organizations are referred to as Developers, and the FreeBSD Project as a whole is referred to as the Community. Individuals wishing to make a difference are encouraged to contribute to the Project in a number of

different ways: through donations, via the volunteer computing project, via the FreeBSD software repositories, or through FreeBSD Developer training.

Role Models Some of the early contributors to the FreeBSD Project share some similar characteristics. These people are referred to as Role Models, and represent the community in the eyes of the world. These individuals have contributed more than just code and documentation. These people have acted as ambassadors for the Project, lending a helping hand and sharing their experience to anyone in need. The Role Model list is updated once a year to reflect new people who have come into the spotlight.

Media & Press The FreeBSD Project has a

working relationship with the free and open source software community, and is covered regularly by the media. Some of the media outlets are listed here. Contact The FreeBSD Project welcomes your feedback. Email the FreeBSD Core Team using the information listed on the website, or email the FreeBSD Engineering Team using the list. The FreeBSD Documentation Team also welcomes your feedback. Email the documentation team on the list. This list is the preferred means of communication for most people. The FreeBSD Project, including its donors, sponsors, developers, users, and citizens, seeks to create a welcoming and inclusive community that is a meritocracy. We

encourage minority groups to participate in our projects. **Qualifications** The FreeBSD Project is available to any United States citizen or permanent resident. Foreign nationals are welcome if they can provide documentation of their green card or other work permit (such as a driver's license), and a letter from a US employer stating the basis of their employment in the US. The FreeBSD Foundation is an independent corporation, funded by the general public through donations, and staffed by paid employees. The FreeBSD Project is hosted and managed in the USA by the FreeBSD Foundation. The project is not run by any university or by any corporation. All donations are made

voluntarily by individuals. The FreeBSD Project is based on a set of guiding principles, the first being that it is owned by its contributors,
