Internet Explorer is one of the most popular web browsers used to view websites. Although the Internet Explorer browser is still the most popular, it has become less popular with new web surfers. Chrome is a fast, free, easy to use, secure browser. It has many features including: * Built in video uploader * Built in gallery viewer * Built in web developer tools * Built in bookmark manager * Built in file manager * Built in PDF viewer * Built in e-mail To use Internet Explorer for web surfing, simply open the website, type in

the URL and press "Enter". If the website doesn't appear, you may need to install the latest version of Internet Explorer. If you don't have a personal, non-commercial, internet connection, your computer must have a modem. You can get a modem for $15-$20. You can also buy a computer with modem built in for $50-$300. If you have a computer with a built in modem, then you can skip this step. If you have a modem for a different phone line, you'll need to connect the computer to the phone line and the modem. A modem is connected to the computer and the phone line. The computer is connected to the
