A Book with No Title

Main Website Posts A: If you find a URL that contains only? characters as below in your browser address bar you can easily remove it as below, For example if you want to remove all URLs having question mark? Visit this website www.123cleaner.net and download the extension to do that. Q: How to split the part of the text that has numbers and a space to separate them? I have the following CSV : "id" ;"main" ;"price" ;"count" ;"available" "1918" ;"car" ;"2000" ;"5" ;"true" "4589" ;"bike" ;"2000" ;"5" ;"true" "1918" ;"bike" ;"2000" ;"5" ;"true" The "main" and "price" column can be like : car,bike but as you can see it is difficult to split the "price" as in the "car,bike" case. I want to get like this : "id" ;"main" ;"bike" ;"car" ;"true" "1918" ;"car" ;"bike" ;"true" "4589" ;"bike" ;"car" ;"true" Can I do that with Excel? If not how can I do that? Regards A: If you enter the data as text and click on the Special button, you should get the Input Mask option. Select the text that you want to see highlighted and click OK. See this screenshot: Then you can: Copy the value to the clipboard Select the text you want to separate and paste it in Notepad++. You can also do that in Excel. I got the Excel input mask option from this answer, but it could be in there. One third of all new hires have worked for a company that went bankrupt, but a new study says new employees are being passed over because they don't have the same connections as older employees. Faced with a growing unemployment rate, hiring managers say they're hesitant to hire entry level workers who don't know anyone or have an active social life. While anyone can make a new friend, there are some people who can more easily start one.
