

May 8, 2020 - My HDD sucks, so I wanted to use HDD Regenerator because it seemed that bad sectors have been on the rise lately. So I created a bootable USB, . In this video, I briefly list what I have done and what I have learned. Step 1 I have backed up my data Step 2 I created a bootable USB using the USB-HDD program Step 3 I downloaded this when I booted from a USB stick Step 4 I deleted all my personal files and changed the boot device priority to "None" Step 5 Connect USB stick to my computer Step 6 If you have any kind of hard drive, you can use it to back up your data. Step 7 Run
