AutoCAD (Updated 2022)

The first version of AutoCAD, version 1, was originally released in October 1984 as a 32-bit version with a 16-bit I/O port, but the 32-bit version had a much larger market share. The 32-bit version of AutoCAD lacked many of the features found in its predecessor, DiagrammeR, including: full 3D drawing, non-orthographic display of coordinates, direct editing of coordinate systems, editable surfaces, and non-editable surfaces. However, 32-bit AutoCAD still had many of the features of the previous DiagrammeR program, as well as some new features that were unique to AutoCAD. On December 1, 1993, Autodesk sold AutoCAD to Corel, and AutoCAD became a Corel product. In April 1997, Corel sold AutoCAD to Microsoft, where it has remained ever since. Since the 2013 release of AutoCAD 2014, the latest version of AutoCAD, it has included the features of the current 2017 version of AutoCAD. The program was designed by Ev Evans and Larry Tesler, and it was first released in October 1984. Autodesk describes its version history as follows: "Since its debut in October 1984, AutoCAD has supported a variety of platforms and markets. As the market for 2D drafting grew, so did the capability of AutoCAD, with the introduction of new features and functionality at each major upgrade. AutoCAD users are continually updated by introducing new features and resolving common user needs. The latest version of AutoCAD is AutoCAD 2017." Evans has described the development of AutoCAD as a serendipitous accident, which occurred one summer afternoon in 1981 when Evans and
