Haali Reader

"Haali Reader is a Windows app that lets you quickly and easily open and read plain text and XML files. If you are looking for a clean and useful interface, you should give this app a try." Haali Reader – try it yourself Haali Reader is a small Windows application designed to help you open and read plain text and XML files. In this tutorial we'll create a simple 3D environment for showing a text block and display it inside a 3D cube. I have chosen to use 3D MAX, but you can easily follow this tutorial using any other 3D authoring software as well. Note: 3D MAX is a standalone application, while Mental Ray has a plugin for 3D Max, but you can also use it within Adobe Bridge. 3D MAX and Mental Ray come with their own renderer, and so you will need to have them installed on your system before continuing. Note: Mental Ray comes with a 6 renderer, but you only need to have 5 of them installed in order to create new projects. 3D MAX RENDERER First, we need to add the 2 renderers to our system: 1. Extract the 3D Max folder from the Mental Ray installer to any location on your system. 2. In the search bar, type "render" in quotes and press ENTER. 3. Find the renderer "Render Max" and double-click on it. 4. In the resulting dialog, select the option "Always start with a new project" and click OK. Mental Ray RENDERER If you are using Adobe Bridge, you will need to make sure the software is installed on your system first. 1. In the main menu, choose "Mental Ray". 2. Click on "Preferences" to access the following panel: 3. Click on the "Renderer" tab. 4. The following list will show you the available renderers installed on your system: 5. Select the renderer "Render Max" and click OK. 3D MAX PROJECT Now we need to create our 3D project. You will need to have the "Data" folder created previously on your system. To create a new project, simply press the New button: 1. In the dialog that pops up, select "3D" as the type of the project. 2. Click on the "Data
