### Topview iPod Video Converter (LifeTime) Activation Code Download

Topview iPod Video Converter is an all-in-one iPod video conversion software designed to convert video files of multiple formats to the MP4 extension, supported by iPod devices. The interface of the program is plain and pretty simple to work with. Video clips can be

---

imported into the list by using the file browser only, since the "drag and drop" method is not supported. Batch conversion is possible. In the queue you can read the source path, title, duration and status of each video. All you have to do is specify the output profile and directory, in order to proceed with the task. Furthermore, you can modify audio and video settings when it comes to the bit rate, quality, size, channel mode and volume, change the filenames, remove an item from the list or clear the entire queue, as well as enable Topview iPod Video Converter to overwrite existing files. The video conversion software takes up a low amount of system resources, has a good response time, quickly finishes a task and keeps a good image and sound quality. We haven't encountered any technical difficulties during our tests. On the other hand, there is no help file available and you cannot change program settings (e.g. enable Topview iPod Video Converter to automatically turn off the computer once all tasks are done). But, even so, we strongly recommend this application to all users.
