Over the years, AutoCAD LT has been developed for personal computers (PCs) and smaller desktop computers. A version of AutoCAD for smartphones, known as AutoCAD Mobile, was released in 2011. It runs on Apple iOS and Android devices, and includes the same features as the desktop software. AutoCAD Mobile has been praised for its clean interface, intuitive touch screen interface, and the ability to open drawings that have been saved to the phone's internal storage. AutoCAD Mobile was discontinued in March 2019. AutoCAD LT runs on Windows, Mac, and iOS devices, and can also run on Chromebooks, Tablets, and Android smartphones. AutoCAD LT 2020 is designed for use at the drafting table as the most powerful desktop-based CAD software tool. While most of the drawing functions of AutoCAD can also be performed using the mobile versions of AutoCAD, many of the editing and modeling tools require that AutoCAD be installed on the desktop computer. Designating AutoCAD commands AutoCAD commands are one of the most common methods of communication among users and with CAD software. Some AutoCAD commands are not found in any other software application. Each command can be executed by pressing a sequence of keys, and its syntax, or the word order used, can vary from user to user. If a user needs to refer to a command, he or she will need to know which command it is. One way to remember the command is to think of the command's name as a verb, such as "Draw" or "Toggle View", and to note that it begins with an underscore. The commands that AutoCAD can be used to create, modify, and edit a drawing have been divided into two categories: those that modify the current drawing, and those that create a new drawing. The commands for drawing and modifying existing drawings are used to set up the drawing area

Ayanna Pressley (D-MA) on Sunday tore into President Trump for re-upping his attacks on four freshman progressive House Democrats who voted against a border spending bill on Friday, calling the president's outburst "petty." Pressley, who is the first member of Congress to endorse Bernie Sanders in the 2020 presidential race, pointed to comments Trump made last week during a cabinet meeting where he blasted the four lawmakers — Reps. Alexandria Ocasio-Cortez (D-NY), Ilhan Omar (D-MN), Ayanna Pressley (D-MA), and Rashida Tlaib (D-MI) — for opposing the legislation. "Four hard-working Congresswomen, who I truly believe, are fighting for their constituents and America," the president said at the meeting. "We will support them." The president's statement came a day after he tweeted his disdain for the four lawmakers, who are all of color, for voting against the legislation, which included a four-year extension of temporary protections for those brought to the country as children. "All they want to do is impeach you," Trump told the four Democrats during the meeting. "They are crazy. They want to ruin your lives. They want to do whatever they can to destroy you. They are a bunch of Communists." The four lawmakers responded to the president's remarks at the meeting and he subsequently released a statement saying they were "ignorant" and "just cannot understand the decision to vote against a vital bill that will keep our government open," before referencing Rep. Ocasio-Cortez's recent comments on Twitter about socialism. "I don't know the congresswomen you are talking about, but I can tell a1d647c40b
