What's New In?

Make design and engineering faster with the new tools for electronic representation. Generate electronic data based on your drawing. This can include database tables, GDS 2 or GDS 3 files, spreadsheet cells or annotations. (video: 5:00 min.) Design analytics have never been so accessible. The new Create Dimension pop-up window allows you to access views of your drawing directly from AutoCAD. (video: 1:12 min.) Perforate entire sheets in 3D with the command new perforate 3D. (video: 1:09 min.) The layer order function has been improved. No longer do you need to duplicate an object and then move it to the top layer. AutoCAD now automatically maintains the original layer order, so you no longer have to be reminded to move objects to the top layer. (video: 1:10 min.) Are you working with CAD files that contain multiple sheets? Are you overwhelmed by the complexity of navigating a drawing containing thousands of sheets? No longer do you have to deal with layers and separate sheets. The new Multiselected Editing tools make working with multiple sheets or sheets in a 3D model much easier. The Draw at a Tool Path dialog box is a new feature in AutoCAD 2023, and it helps users insert an object at a specific point on a tool path. You can use the Draw at Tool Path dialog box to create a working block for a B-spline curve. You can customize your drawing by using the new custom tools. They are available for every command. They are designed to be as simple as possible and are very easy to use. Work faster with the new interactive methods. Find features on the ribbon or in dialog boxes without wasting time.
