Backup the current registry before you make changes. Restart your computer. Placental site trophoblastic tumour in a patient with chronic myelomonocytic leukemia. This report describes a placental site trophoblastic tumour (PSTT) in a patient with chronic myelomonocytic leukemia. PSTT was diagnosed at age 37 years. Several previous reports in the literature have described primary or secondary malignancies in association with PSTT. Moreover, few reports describe malignancies other than myelodysplastic syndrome, non-Hodgkin's lymphoma, myeloma, and Hodgkin's lymphoma associated with PSTT. This report suggests that the risk of malignant transformation in patients with PSTT might be higher than previously thought. Spinal Muscular Atrophy With Respiratory Distress 1: A Tandem Repeat Expansion Disease. Spinal Muscular Atrophy With Respiratory Distress 1 (SMARD1) is an autosomal recessive disease of the neuromuscular system characterized by a triad of symptoms including respiratory distress in early infancy, proximal muscle weakness, and fasciculation. Until recently, the genetic cause of SMARD1 was unknown. Recently, mutations in a gene encoding for a component of the cytoplasmic dynein complex, dysbindin-1A, were described in patients with SMARD1. We describe a novel pathogenic repeat expansion mutation in dysbindin-1A in a family with SMARD1 and discuss the differential diagnosis of neurodegenerative motor disorders in the early stages of life. On the first day of the new year, the newly appointed president of the United States, Barack Obama, has appointed...well,
