Installing the Modules on Fantasy Grounds The Modules have been converted to work within Fantasy Grounds. The following details have been found:

Starfinder RPG - Starfinder Critical Fumble Deck - contains: Starfinder_RPG_StarfinderCriticalFumbleDeck_v1_9.zip -.zip This is a zip folder containing an xml file with all the map tiles contained within the folder. Each individual map tile references the location of it in the map text file provided with the Module.

Starfinder_RPG_StarfinderCriticalFumbleDeck_v1_9.map.txt - Map text file Description of the map text file. The map text file references all the tiles contained in the zipped folder, telling Fantasy Grounds which map object number the tile is within that location in the map. This allows the map tiles to be loaded in as objects from the map area in FG.

Starfinder_RPG_StarfinderCriticalFumbleDeck_v1_9.fmts - example of the map This is an example of the map. This shows all the objects in the map. In this map, the objects are defined as circles, and are easy to follow. Any empty spaces in the map are blank areas that can be used for your own custom tiles or for putting up your own custom text. The numbers in the image are the objecID numbers (the images are created out of a grid system), the tiles are map objects from the original module. Barn Finders Download [32|64bit] [Updated-2022]

The year 2020 has brought tectonic shifts in the way we create, work, play, and explore. As we are forced to adapt to these changes, a number of creative and innovative industries emerge

with the goal of preserving “old” and “new” ways of thinking and working. One such industry is that of VR, and Tahul is its inaugural winner of the SIGGRAPH 2020 VR Theater. Tahul is a virtual reality experience based around a fictional lost world reminiscent of ancient, Moroccan culture and was created to highlight the winners of the SIGGRAPH 2020 VR Theater. In Tahul participants interact with an artifact that gives them control over the four elements from Arabic alchemy: fire, water, earth and air. These elements can be used to manipulate the virtual environment and provide participants new to VR with a learning experience. Tahul culminates with previews of this year’s Selection. Players will find themselves navigating the world of Tahul in order to unlock the mysteries of this ancient culture in VR. Players can manipulate the four elements in order to open doors, navigate hallways, and solve puzzles. They can “heal” obstacles by extinguishing them, or simply walking over them. If all four elements of the alchemy are aligned, they can even activate “spells” to complete puzzles. Players must learn the tricks of the trade as they explore the world of Tahul to unlock its many secrets. Tahul is a narrative-driven experience that will explore the world of Tahul and the history of the alchemy through an immersive, exploration game. From the creators of VisVR Ono de TVerwieden the VR TV and storytelling service that captures the sense of presence in virtual reality to the immersive and engaging VR storytelling platform, VisVR Ono de TVerwieden is taking storytelling to the next level in virtual reality. We have brought together the mix of the worlds “VR” and “Omnidirectional”: Players can transport themselves from their home or their office and experience VR to a magical world where they feel like they are part of the story. Zoom into the 360 degrees immersive cinematic virtual reality experience and experience the story as it unfolds. Enjoy a more immersive and immersive experience on your 4k headset. Revel in the thrill of flying with PSVR Whilst most people today would have never claimed to be a pilot, something about our natural sense

To play, just drag and drop the game files onto your Steam client (from the.zip archive) and launch the game. If it says "You are running in Compatibility mode, turn off compatibility mode and try again." then you're using an old version of the game, so download the current version. Version 1.0.1 2019-11-12 Fixed a bug where garbage might get stuck when the ship is moving, not anchored, and the button to release the harvester was being held down. Note this is not a "If you have this bug, don't move your ship! It'll break everything!" bug, it's just a fix. Version 1.0.1 2018-07-31 Fixed a bug where the game would sometimes freeze when landing if the ship had captured a large amount of junk. Added in the Steam Community Hub so people can add their own "tags" for keywords, like a community wiki. Added an option in the settings to control how hard the rubbish or asteroid is to hit. Added a description of the options to the game with buttons to set them on the interface. Version 1.0 2018-01-05 Added "on ground" gravity so the player can reach the edge of the ship. The game now remembers your settings so the next time you launch, it will play the same. (This applies to players who have deleted the game data before, but haven't restarted Steam.) When the player is anchored, the game will no longer move around the screen when in a space junk game. This allows for a more cohesive game experience. Added space-highlighting in the nav/log/inventory GUI so you know where to go to make changes in these areas. Added debug logging so you can find out why the game was stuck. Minor bugfixes and updates. Version 1.0.0 2017-11-30 So, I released a pre-Steam release the other day with an experimental "lacking steam API/libs" version. It had a lot of stuff missing to make it into a proper steam release, but I figured I might as well put it out there. Everything was good, until this morning when I uploaded the updated game data to Steam, and tried to run the game, only to get the "There was a problem connecting to Steam" dialog. Shit

What's new:

The Kingdom of Karnage is located South of Caer and is ruled by the famed Lord Karnage, himself a Zaerse of Karnage. The next in line for the Throne of Karnage is his son Reyne, the Crown Prince of Karnage. The Karnage Kingdom has a rich cultural heritage and is known for the arts, crafts, sciences, and architecture. The Karnage Kingdom is a Diplomatic Ally of Amperean Kindred, and an Alliance Ally of Eberron. The Karnage Kingdom is a Republic and is not at War. Karnage's History and Culture A Kingdom amidst a Wilderness The Karnage Kingdom's understanding of its people's past is almost a legend, spoken by the people only in whispers. This is as much a result of their isolation as it is a byproduct of the region's wilderness. A river once flowing through the center of Karnage has dried up, and the people could not be farther from their spawn. They have come to be known as the People of Silence. To know the Karnage of the past is to know part of the Karnage that is gone. The People of Karnage dwell in caves, and have only barely discovered the use of concrete. Most of their civilization is carved out of stone and wood, with the Elders are the ones who have the instinct to shape the limestone into large whips, or spearheads. The people of Karnage could be considered nomadic by choice, but not by necessity. The Elders often travel in small bands, preferring a well-maintained road to the freedom of a trail. The People of Karnage are perpetually on the move, and it has always been. They are always fine in any given place, and they have never had a seat of power. Their lives are always on the line, and they fear nothing. Their ancestors may have been nomads, but their descendants are not. The Elders are always vigilant, they are never deceived as easily as they let down their guard. The People of Karnage are united by the common thread of their battle for survival. They come together to fight—when they can't be sure that something isn't out to get them. They have been fighting since the first settlements, and the military role has been vital to the Kingdom. They have always been soldiers. While no one knows where the Karnage came from, they are averse to the idea
