Download Link CorelDRAW Graphics Suite X7 17.1.0.572 (64 bit) [ChingLiu]Q: Excel VBA - array results in Runtime error '91' I am running into a problem with the following code. I have more code to the actual function (in simplified form): Function Bid(ByVal iRow As String, ByVal iCol As String, ByVal AP As String, ByVal IP As String, ByVal AS_String As String) As Double Dim APValue As String Dim AS_Value As String Dim AP_Value As String Dim IP_Value As String APValue = Evaluate("=AP[" & iRow & "]") AS_Value = Evaluate("=AS[" & iRow & "]") AP_Value = Evaluate("=AP[" & iRow & "]" & iCol & "]") IP_Value = Evaluate("=IP[" & iRow & "]") Bid = APValue * ((iCol = 2) * (AS_Value) + (iCol = 3) * (AS_Value) * (IP_Value) + (iCol = 4) * (AS_Value) * (IP_Value) * (AP_Value)) / (1 + (1 - AS_Value)) End Function My issue is that I get the following error when the following line runs: Bid = APValue * ((iCol = 2) * (AS_Value) + (iCol = 3) * (AS_Value) * (IP_Value) + (iCol = 4) * (AS_Value) * (IP_Value) * (AP_Value)) / (1 + (1 - AS_Value)) The error says that the syntax is incorrect (line 14) but I cannot seem to spot the problem. I have tried Googling the error, but I am struggling to find anything that really makes sense of it. Any help with this error? A: Solution Is to use Call instead of Evaluate Example Bid = APValue * ((iCol = 2) * (AS_Value) + (iCol = 3) * (AS_Value) * (IP_Value) + (iCol =
