by dermalee on 7/2/2013 at 16:29 MY TAKE ON ELEGANCE OF GIRLS FANDOM. There are a lot of people out there that are annoyed by the concept of EoG. Most of these people are of the belief that the entire idea of EoG is something that should be extinguished from any known system that exists within our society. They believe EoG somehow brings these men down. The simple fact that there are women out there that enjoy the world of EoG and identify themselves as EoGs is something that these types of people simply find unacceptable. These people see that it is perfectly valid for women to enjoy the opportunity that EoG is. They then proceed to label the idea of EoG and the characters that exist within it as something that is completely wrong. The mere fact that EoG may be an antiquated concept of one day is something that these people feel that is completely unacceptable. That is what I mean about defining the rules of EoG. These people also feel that the only place where a woman could feel attracted towards the idea of EoG is within the realm of the internet. They believe that no woman could possibly be attracted to such a harmless concept. I get the point that these people are trying to make but it is not valid. I actually do enjoy the concept of EoG. The fact that there are women out there that enjoy these characters and their world is something that I feel is completely acceptable. They are doing something that is completely harmless and does not harm society in any way. Personally, I believe that the idea of EoG is an idea that I enjoy. The fact that it may be antiquated is something that I feel is something that people should be able to accept without being made to feel as if they are wrong. What is the point of trying to squash the idea of EoG? It is the fear of anything that is different in the world. Anyone that is different from the norm are to be afraid of. The truth is that the entire world of EoG is nothing more than that. It is something that is different than what we are used to. Every society that exists within our world tries to erase everything that is different. The fact that EoG exists is a perfect example of the fact that we do not have to be this way. bff6bb2d33

But sometimes the good doctors make the wrong call. Case in point: last week, a drug company called Backstreet Research made a public announcement about a breakthrough drug for a mysterious disease called "Fibromyalgia." The drug, termed "titratable," is not approved in the United States, or anywhere else for that matter. But it is approved in 20 other countries, including Great Britain, Australia, and Germany. The company already has agreements in place with several major pharmaceutical and health-care companies, and is negotiating with many others. "Titratable" is potentially worth billions of dollars, and the news of its safety profile and lack of unknown side effects sent shock waves through the scientific community. The story kept getting
