This DLC contains: -KABAR USMC Fighting Knife - KABAR is perhaps the most famous knife of the marine corps. It was first used during World War II by the Korean resistance during the Japanese invasion. It was invented by a Korean whom was upset with Japanese for their oppression of the South Korean people during the Japanese invasion. The knife was designed with its unique right angle blade and sharpened very well for a hand made knife. Even during the Vietnam War it remained the official weapon of the Marine Corps for close quarter battle (CQB). KABAR The Knife | www.kabarknives.com -MP34 "Elite" Skin - MP34 "Elite" Skin was a skin used for the U.S.P.S. model of MP34 Shotgun. This

skin was released during the Vietnam War by the Army Rangers. It even made an appearance in the Vietnam war movies "Platoon" and "Full Metal Jacket". The Army Rangers used this weapon to take out snipers and secure the area. USPS M6 "Elite" Skin | www.tacticalgearz.com -Revolver "Battle Scarred" Skin - The Revolver "Battle Scarred" Skin was designed for the single action revolver. The revolver itself is more of a side arm to the firearms. So people used them as a shoulder arm. The revolver was used during the Vietnam war and saw use during the Civil War as well. It has become somewhat of an iconic firearm for the United States. Even though it was only used for a limited amount of time, its still very well respected and remembered. What's new:

PatternHi there, We are a small company in Halle that is looking for composers to replace old MS and Android default applications. Right now we would prefer to work with people from Germany or people with a good English understanding. All I need are Composer's github-presence to get started with the work. Our current project env is not yet at all experienced with Composer, so we want to make sure that we can find the right composer for each project. In the project we are using the filemanager FuzzyS3 as a backend. That's not the problem, as we will be able to use any of the composer's backends provided by Subini. That's our experience so far. Our core functionality is based on SSO and the user will be provided with a login-link on our homepage. We have preferences for the login- link layout. A possible very simple example is the LinkedIn logo. 1. Login 2. Logout 3. A simple confirmation-popup (only information) with two buttons to choose from 4. Full control of the application for the user WOLA/WOLAI^^ 2 Theme composerThis is a simple theme (only html/css) for WOLA/WOLAI^^. NOTE: This WOLA/WOLAI^^ is a simple theme. Just erase everything and you should be set, the script is Simple. Enjoy using this template (It is a WOLA/WOLAI^^ which not an Opencart template available). anything and everythingILoveComposerI know, I know- I keep going on and on about how great Composeris, and for the last couple of weeks I've "been an expert Composer", you know, like, making a submission, an entire project, transacting with the programmer, rehearsing the performer, developing the music, studying the arrangement, and all that good stuff. Here is what I have created in the last

few weeks: 3 different groupings of Com... I am under the impression that Composer can be used to make simple dynamic forms. I.E. first the data is displayed in the composer, making editing possible, then the form is submitted and updated. What is the simplest most simplest way to do this? We are talking 10 lines of code or less no
