FIFA is the world's most popular sports video game franchise. The FIFA video game franchise is developed by EA Canada, and published by EA Sports under the EA Label for the PlayStation(R)2 computer entertainment system, Xbox(R) computer entertainment system and PC. How can I become a better player? EA SPORTS FIFA is a game that can be played and enjoyed by anyone from casual players to the most skillful professionals. The game is set up to make even the most experienced players want to find out how they can improve their play. The game provides a range of player-customizable settings that are intended to let you, the player, control how the game is played. So, if you don't like you're ball skills, you can mute them. If you don't like your instincts, you can switch them off. Will

there be matchmaking in FIFA? Yes. Along with our traditional matches, which are made up of a series of prearranged matches, we're adding a new experience called Quick Match. In this experience, you play random matches to see if you can reach a certain level of play. We also have the new 'Legends' mode that lets you play random matches with players who have become legends. And, if you're looking to train your own skills, you can now play offline practice matches with your friends or against a friend on the same console. How about coaches? To celebrate the 20th anniversary of FIFA on Xbox 360 and PS3, we have also added a new, integrated coaching system in this edition. The new approach lets the player take direct control of a team. You can manipulate the team in every situation and actually issue instructions to the team, such as 'Rush forwards' or 'Stay back'. You can also work on your players' skills by training them or handing over responsibilities to them. What is the main innovation in FIFA 22? We've put our entire team into the development of FIFA 22, so there is a wide variety of improvements. But the one innovation that has received the most attention from our development team is the introduction of 'Fluid Performance.' This new system aims to make the most accurate game simulation possible. It's important that you play football the way you think it's played. Not only that,
