\*\*\* A love story in space! \*\*\* Yume is a young girl, the only daughter of rich and rich business people. She has been forced to take a scholarship and fly to join the SkyRace competition. She won't be competing in the usual circuits of her home city, she will be flying in the space circuits of the Ultra-Engine. Fight against other Nirvana Pilots in the Ultra-Engine, race in pulsing retro-themed virtual reality, master the speed of the Ultra-Engine in time-loops and unlock the secrets of the Infinite Island of the Speed of Light. Screen Shots: News Rollin'Game's Retro Road Trip: Nova6 Rollin'Game is a Youtube channel run by videomusic producer Marco "Rommel" Serra. Rommel reviews and plays various video games, from all eras and styles. This edition's title is Nova6, a Shooting game (I'll talk more about it in the review). Released in 1987, Nova6 became the first commercial one-on-one shooting game in console memory. It couldn't have been a big deal at that time (I'll talk more about when in the video, but if you think about it, it isn't even a big deal now), but at the time it came up as a game totally new and amazingly well done, and that's the reason this game has appeared in the first edition of this year's Video Games Retro Review. In this retro review, as usual, I'll play and review the game, taking you through the different stages and the gameplay: Intro Stage 1 - Practice mode Stage 2 - Normal game Stage 3 - Practice mode, night mission Stage 4 - Practice mode, night mission Stage 5 - Practice mode, night mission Finish: Game over Normal Game - Rewind/Play modes Ending 1 - Game over Ending 2 - Game over Ending 3 - Game over Ending 4 - Game over Ending 5 - Game over Ending 6 - Game over Ending 7 - Game over Ending 8 - Game over Ending 9 - Game over Ending 10 - Game over Ending 11 - Game over Ending 12 - Game over Ending 13 - Game over Ending 14 - Game over Ending 15 - Game over Ending 16 - Game over Ending 17 - Game over

About This Game A fine art noir game that is as stylish and stylish as they come, Third Eye Crime is an all-new point-and-click detective adventure with a modern feel. The story takes place in 1947 in a small city in Texas. A young woman named Nina (voiced by Taraji P. Henson) finds out that her alcoholic father is missing and disappears with her young son and a suitcase full of cash. Her husband Samuel (Fred Melamed) left their house with a story about trying to win the lottery. Once the story begins to unravel, Nina discovers a portal into a parallel world where she meets three other people with the same dream as hers. Unfortunately, by the end of the game, she discovers that she was not alone, and that she is responsible for all of the murders in the city. Third Eye Crime has a terrific sense of style, with slick motion comic panels that move the story forward, simple but beautiful noir visuals, and an absolutely fantastic soundtrack. Second of all, the best part is the sense of play. If you've been into classic mystery games lately, you'll know the drill here: Tread lightly and listen carefully. But Third Eye Crime really shines in its art design, setting and story. Unfortunately, it was too short of a game, with poor pacing. While I did enjoy Third Eye Crime, I think it would have been great if it had been a full-fledged noir game instead of a thriller. I really like the look of the game, but I found it to be quite glitchy. The occasional game hangs for minutes at a time, the audio at times struggles to match the visual quality, and the motion comic scripting gets skipped over frequently, which is a shame since the comics are the best part. This is not the fault of the game, but the developer is a software house that does not have enough manpower to offer beta testing support (this is on Android), so they need to take an increase in price. Your character is on a quest to find the answer to a question. The story is driven by a question: What happened to your missing father? Or, how did your missing husband leave the city? Your investigation leads you to a face that the young actress looked like in her youth (enticing). You, then, call on your ex-friend. He uncovers a face that was in the newspaper after the killings and tells you that the girl is involved.

The game is designed by 25 years old indie game developer, who brought his childhood dream to life. During his time in education, he studied Unreal Engine 3's modularity and 3D modeling, in order to develop and craft the game. And thus, Xeno Tech: The Game was born. He was then transferred to Prague, Czech Republic, where he began the development of Xeno Tech: The Game. With over 3 years of solo development in order to accomplish this incredible project, this game is unique in its own way. The Game is not only a shooter, but also an adventure of sorts, adding an RPG element to the story. Players will be able to explore the city, find friends, fight enemies and master multiple skills to advance through the story, it is the exploration of all of these elements that makes Xeno Tech: The Game so unique and different. The Story in its own way is about the rise of the Deviants in order to face off against Xeno Tech.
