Computer science is the study of computation and computation systems with respect to the abstract principles of logic and mathematics applied to the computer.[1] With the development of the computer, the concepts of computer science has evolved from what is known as the theory of computation to what is known as a theory of computation and computation systems. The domains of computer science are very broad and range from the study of computation on paper to the study of the operation of computer-based machines, and many other areas in between. Computer science is a multidisciplinary field with roots in mathematics, logic, and philosophy. Computer science students study the following areas of computer science: Computer science Computer network science Database management systems Computer architecture Data structures Distributed computing Software engineering Computer programming Programming languages VLSI chips Programming languages .the Sundance Audience Award in its respective categories. Mark Ruffalo will return as Don Cheadle, the lead in the film, in a limited engagement this month at the American Repertory Theater in Cambridge. Chris Martin of Coldplay will be the closing night host and musical guest. Actors who auditioned for the movie claim to have, on average, been cast in roles that are three years younger than their real ages. Adam Sandler, who will play a middle-aged father, told T Magazine that the movie was "fantastic" and that the casts included "20-year-old kids playing 18-year-old kids." I'm looking forward to it and will be at the screening in a few weeks. (Well, if I can get tickets, which I'm having a hard time doing.) 1. Excuse me, would it be possible to borrow your phone?- I need to call someone.2. I'm sorry, but that is an electronic cigarette. I need it for the smoke free section.3. Sorry, guys, but if you don't rent the DVD, you'll have to leave the theater.4. OK, here's some water. Would you like some gum?- Do you have any gum?5. We're out of toilet paper.6. I'm sorry, but can you turn down the music?7. I can't reach my son. Can you contact his school?8. I wish I had brought a sweater.9. I wish I

I have added some code to display the variable out in the Command Window when I run the function. However, it is returning null as the result. How do I get the variable to be the item in the List that I select from the button? PseudoCode is below, adding a full code example helps answer this Assign a variable within a function from a List of objects, the List can be an ArrayList. The function is called on a button click the value of the variable is then displayed in the command window. cmdOutput is null in my function. public static void myFunc(List cmdOutput) { if (cmdOutput != null) { for (MyClass myClass : cmdOutput) { for (int i = 0; i
