You are a rich man's daughter, a sexy girl, who has everything she could ask for – but still, something isn't right. Every day, when you get home from school, you find an erotic message from an anonymous unknown. You keep receiving them, it's as if somebody's obsessed with you, that person is lying in wait for you, and nothing will be left as it was before. You are a rich woman, Senpai, the son of a company president who hires students as 'company girls' – and you have been hired as his daughter's roommate. But, strangely, every day, his messages reveal an unprofessional side to him. Dakimakura is a game about the way you move your mouse on the screen. Any interactions that take place can be repetitive, and boring, but it doesn't have to be that way. It's a puzzle that challenges the player to learn to enjoy repetition itself, and to eventually fill the situations of everyday life with unexpected visual and sound effects. Taken from the original Japanese game 'Dakimakura', a game which was nominated for 'Game of the Year 2013' by the Japan Game Awards. "Wake up and smell the coffee! It's a beautiful morning - a little smell of coffee is not going to kill you! Experience the full spectrum of emotions of waking up with a nice cup of coffee – but if you don't, you'll have a strong headache. And we won't get paid today!" Mod Content You can upload your own 'dakimakura' images and add them into your personal collection. FAQ Q: How do I upload my own 'dakimakura' images? A: Enter your Steam ID (and note your Steam password), then click on 'Settings' and 'Community' and then click on 'Mod me'. You'll be presented with the 'Manage Mods' screen, then click on 'Browse Local Files' and click on the mod file you want to add. Q: What kind of scenes can I find in 'Dakimakura?' A: There are many different types of dakimakura, ranging from erotic games to love stories. Q: Is there any relationship between the characters? A: No, not at all. Characters from 'Dakimakura' are just illustrations, not characters from real life. c9d1549cdd

Granulocyte colony-stimulating factor attenuates IL-4-mediated fibrogenesis in mice. Granulocyte colony-stimulating factor (G-CSF) has been shown to be beneficial in some inflammatory conditions, such as periodontal disease, ulcerative colitis, and arthritis, but the role of G-CSF in the development of fibrotic disease is unclear. This study investigated whether G-CSF could ameliorate the development of pulmonary fibrosis induced by the administration of IL-4 to mice. G-CSF significantly decreased the wet/dry lung weight ratio of IL-4-injected mice compared with that of controls and, in the pulmonary tissue, attenuated the severity of alveolar septal thickening, peribronchial and

**(MP3) The Bonfire 2: Uncharted Shores Soundtrack (MP3) This is the soundtrack that will be played in the rotoscoped documentary movie's on the Discovery Channel's "On Location TV". When asked of me, if it would be possible to get other companies to provide the music for the movie, I told them no. The same recording company that I used for the original official soundtrack turned me down. If it is of any interest, this is the entire soundtrack of the original soundtrack from The Bonfire 1. If you haven't had the opportunity to experience it yet, perhaps now's the time to do so. If you have any interest, below are the links to where I got the main tracks, but the full soundtrack is also available from Amazon and iTunes if you need it in a format that you can use for your computers/MP3 players or other portable devices. All rights go to Dan Leopard since that is the way we licensed it from the original recorder. If there are any issues with the recordings or any warnings, I will only be held liable for a violation of United States Copyright Law and Acceptable Use Policy. It is my sincere intention to**

Thorium Wars: Build your own scenario... TTRPG is a cooperative 4- to 5-player game of high strategy and close combat where you and your team have to lead the Thorium Wars and bring an energy source to an inhabited planet. The climate is temperate and the atmosphere is low density and therefore breathable. Build your own scenarios from over 20 buildings, buildings, and rooms Choose from 3 different playstyles in 3 different continents: - Classic, when the players are split up and side by side, like in a medieval castle. - Stronghold, where the players team up to take control of a stronghold and defend it. - Free, when all the players are spread out on the battlefield and engage in close combat. Not only the different playstyles are well balanced, but also every single object you place on the battlefield has the desired effect! You can build a mine, a power plant, a space elevator, a research laboratory, or a battle fortress, and everything has a specific effect on the battlefield. 3 different playstyles, different continents: the classic, the stronghold and the free battlefield The buildings, items and abilities of the various playstyles act differently: - For the Classic battlefield, the players split up and team up. - In the Stronghold battlefield, the players are only able to take control of one single stronghold. - With the Free battlefield, the players are not grouped in teams anymore. In this battlefield, every player can take control of his own starship. Spend your energy on building a landing area, on recruitment or on the development of your new colony Each building, that you either can decide to construct or not, has an energy cost. There is no need for an extensive research of new technologies. In the beginning you can just directly build new buildings, however, the more you build, the more energy you have to spend on research. This is basically the way how you manage your energy in the game. The buildings and items in your capital can be upgraded during the game. Upgrading means that you put some points (energy) in a building and it gets modified. This has the following effects: - Single upgraded buildings are more expensive to build. - If a building is upgraded, it always costs less energy per unit than it did before. Therefore, you always need less energy to build it. - The building's upgrade will only work on it if you're the owner. - The upgrade can't be cancelled.
