The present invention relates to a process for preparing microcrystalline wax by cooling a homogeneous mixture of a microcrystalline wax, a polyvinyl alcohol/vinyl acetate copolymer, a plasticizer and a petroleum solvent with a cooling medium in a cooling zone. Microcrystalline waxes (microwhacks) are known from U.S. Pat. Nos. 2,826,521, 2,893,846, 2,937,118 and 3,148,103, U.S. Pat. No. 4,077,983, British Patent 1,349,970 and German Patent 2,455,079. These known microcrystalline waxes are used in particular as a low-viscosity additive for wax-based sealants in order to increase the plasticizing effect and the workability of the sealants. EP 257,539 describes a process for the preparation of microcrystalline wax with the aid of a free-flowing, electrostatically charged composition of at least two oppositely charged components, one of which is a resin. The resin is a polyvinyl alcohol/vinyl acetate copolymer; examples of the plasticizers are glycerol, pentaerythritol and polyglycerol

Best of all, the software is entirely royalty-free, so you can use it to record any version of DirectX, DirectX 8, DirectX 9, DirectX 10, OpenGL, Mac OS X, Windows 7, Windows Vista, and Windows XP, including software such as Quake, Unreal, Half-Life, and many other popular titles. Encoding Option: We offer three different video encoding formats: AVI, WMV, and MPEG. This means that you can change the codec from one encoding format to another. We understand that some titles encode in one codec and others in another. With Quobi you can re-encode your videos to any format you choose. To use any codec other than the one listed, just click on the down arrow and select the encoding format you wish to use. Take Screenshots: Create a single screenshot in jpeg, bmp, png, tga or gif format at any desired time. To take a sequence of screenshots, drag the arrow keys, then select the number of screenshots you wish to take at the bottom of the window. Customize Recording: If you are more into customization than recording, you can easily change the video resolution, bit-rate, framerate, frame size, image type and more by selecting the same options you see in the picture below. Exclusive Quobi functionalities: Record and playback of standard Windows and Mac operating systems ensures that Quobi users are able to capture their games on any platform. Real-time video capture over VGA, D-Video, MiniDV, Firewire or a USB. Audio input recording and playback using WaveOut, Jack Audio or Speakers. You may also use VBScript and JScript, a free script engine, to automate game recording, for example, generating captures based on variables and workflows. Integrated benchmarking and analysis tools: The included benchmark section allows users to test their computers. It gives them all of the tools they need to gain a deep understanding of their system's performances, in real-time. Create a new spreadsheet containing the benchmark results, and automatically update the results table based on your decisions and actions. You can easily send results to Twitter or keep a record of your test results. Test your system with a range of recommended benchmarks for FPS, RAM usage, CPU usage and more. You can control the benchmark test your system by adjusting the CPU usage, with the mouse wheel. By changing the

Path.GetRootDirectory(path); var index = path.LastIndexOf('\'); return index >= 0? path.Substring(index + 1) : path; } } }

How to remove a Windows 7 and Vista recovery partition I'm always trying to remove my recovery partition, in case it causes any problems. I know it's a pain, but it's still worth it. First you need to know what a recovery partition is. It's normally a partition that's used to restore the system if things go wrong. It's pretty easy to remove, just follow the guide below: 1. Shut down your computer 2. Remove the hard drive from the computer 3. Hold down the shift key 4. Insert the CD into your computer's CD drive, in case you don't know where your CD drive is, it's usually below your laptop 5. At the Start up, press F8 The computer will automatically start Windows Setup, you will be prompted to either load a previously installed Windows operating system or to load a copy from the CD you have inserted. Press Enter for the
