and a dialog box will appear saying that you have successfully completed the cleaning process. Step 13. Click on Ccleaner to exit the software and exit the program. Also Visit: Should I pass non-const `std::vector` to a function expecting const `std::vector`? My question is similar to Should you pass vector in a const method call? but it's about what happens if I were to pass a const `std::vector` by value. Say I want to cut out a value from a vector, say at the end: 

```
#include <vector>
void cut_off(std::vector &v){ v.erase(v.end() - 1); }
```

 Should I pass a const vector to it?

Henceforth, .Formation of a new bone attachment: the clinical course of an intrabony defect after stage II root planning. An intrabony defect that failed to respond to conventional therapy was treated by a unique minimally invasive approach. Over a period of 1 year, this defect was treated with the Widman flap technique at least 12 times. Histologic examination of the first biopsy was not considered definitive, but because the patient showed complete bone fill, the Widman flap concept was used to form a new attachment. After at least 3 months, a second biopsy was taken. The bone formed was histologically characterized as a form of bone that exhibited osteoblastic activity and was similar to, but more pronounced than that of the surrounding bone. This patient has had a complete and stable defect fill, a progressive new attachment, no signs of inflammation, and no signs of continued root resorption or bone loss.Q:

La sesi3n se actualiza, pero antes de la actualizaci3n el usuario se queda sin poder acceder al m3dulo, los mensajes de error son los mismos que hacen con la sesi3n normal. Me gustar3a que alguien me ayudara a resolver este problema. Gracias A: La forma de crear una sesi3n en Laravel es bastante sencilla: `$session = \Session::create(); // Usamos el m3todo create para crear una nueva sesi3n // sin necesidad de llamar a la url $session->save();` En el caso de usar multi usando este m3todo: `$auth = Auth::createUser(['email' => $email]); // Sendo la session multi, realmente estamos creando una nueva // sesi3n y, por tanto, estamos llamando al m3todo createUser() $auth->signIn();` En el caso de la pregunta se refiere a un login que se realiza desde el controlador index.php y el login se realiza mediante el uso de `getUser()[id]` y desde el controlador login.php el login se realiza mediante el uso de `postUser()[email]`, de esa manera todo es sencillo, pero en el caso de usar Auth, es importante recordar que los m3todos de `signIn()` o `signOut()` son para restablecer la sesi3n, en este
