Related systems AutoCAD LT uses the native Windows user interface, but provides a subset of the functionality of AutoCAD, and is cheaper than the full AutoCAD system. In 2007, ObjectARX was released as an open source cross platform development framework for building 3D objects and editing in Autodesk 3D Studio Max and other 3D editing applications. In 2007, Autodesk released AutoCAD Architecture, AutoCAD Electrical, AutoCAD Civil 3D, Autodesk 3D Warehouse, and Autodesk Revit, a successor to AutoCAD Architecture 3D. In May 2008, Autodesk released their Visual LISP product, an open source design environment. Visual LISP is licensed under the Apache License. In 2010, Autodesk published the Open Source License, a new open source license that was based on the Eclipse Public License and that allowed the use and distribution of the source code of Autodesk products. In 2015, Autodesk released Autodesk Fusion 360 (formerly known as Fusion Architecture), a collaboration application for architectural, engineering, and construction professionals. Related software Autodesk applications are available for a variety of operating systems. They are optimized for the operating system they were originally developed for. They can be found at both the Autodesk Application Store and the Autodesk website. Each Autodesk application also provides the possibility for creating user plug-ins. These are small pieces of code that can be added to the Autodesk application, and which can provide extended functionality. These can be either compiled or interpreted in the application. The Applications come with an API to help program developers. This API is used to create user plug-ins. Many Autodesk applications are accessed by a web browser and have web-based interfaces. As of 2010, these included Autodesk Revit, AutoCAD Architecture, AutoCAD Electrical, AutoCAD LT, Autodesk 3D Warehouse, and Autodesk Inventor. In October 2010 Autodesk released Autodesk Fusion 360 as a web based application. In 2011 Autodesk released Autodesk Building Design which is similar to AutoCAD Architecture 3D. In 2014 Autodesk released Autodesk Fusion 360, which is a 3D modeling software that includes integrated 360° immersive experience of geometry, flexible drawing and modeling.
