Operational Amplifiers amp Linear Integrated Circuits.. Industrial Control Systems, 3rd Edition by Krans Cheatsheet.I am not an academic scholar in the way that a mechanical engineer, architect, biologist, or mathematician might be. I do not have a PhD in economics, nor do I come from a business background. As much as I'd like to say that I've learned everything from the 'classical' – Leontief and even Marx, I have not. I am a generalist, one of those people who can look at what is going on and see that something is wrong. I've had these aversions for many years and after some searching, I have finally found a forum that has many 'subject' members who can help me with the intellectual support that I need. Let me tell you why I care: I've finally decided to do what I've always been most afraid of: it's time to seek to share what I have learned and hope to have a positive impact by helping others. I have a vested interest in the world as I know it. In fact, I've lived in it (and in the middle of it) for the last two decades, on an economic and emotional level. My wife and I have been through the ups and downs of a middle class life, and we have a family to support now. This desire to continue to share what I've learned as well as my observations, hopes, fears, and aspirations can only help. I am sure that there are many people in a similar situation, afraid to speak out as well as those who have already decided to speak up. I want to be part of the solution.
