Like the features used in FIFA 21, FIFA 22's new mechanics increase ball speed, player speed and accuracy. Many more controls and tools are available in FIFA 22 to improve gameplay. All these tools are in place to create even more realistic movements and interactions. The data collected from in-game tests, combined with FIFA's top gameplay improvements to create the most realistic and authentic football experience on PlayStation 4 or PC. New Simulation Technology A new simulation-based physics engine (MATT) has been integrated into the FIFA game engine that enhances the experience of offensive and defensive plays in FIFA 22. Using the simulation engine, FIFA 22 improves accuracy by allowing for a more realistic approach to ball control and positioning on the pitch. This enables for players to use more of their hands on the ball, making it feel more akin to the real thing. The combined effects of the new simulation physics and the new FIFA control scheme create a fluid, high-tech sport. We've also integrated gameplay from other sports like Hockey, American Football and Basketball, to help FIFA 22 play like the real thing. Because of the game's new simulation engine, players will have more control than ever before, with greater accuracy than ever before. All-New Tactics Tactics in FIFA gameplay are never more important than they are in FIFA 22. The power of tactics comes in all aspects of the game from Player Performance Management (PPM) through to simulated opponent behaviors. FIFA 22 offers more control over the tactics you want to use. Watch how your players interact with the ball and the other players on the pitch. Bring in those new all-new AI tactics, like the Intelligence-based Motion Control Tactics (MICTO) and the Intelligent Control Tactics (ICT) as well as the customized human tactics your players want to use. Or, you can manually select from the vast array of tactics in FIFA 17 or FIFA 19 and put them in place for that particular match. Whether it's your own customized human tactics or using the all new MICTO or ICT, you'll have more tactics to use. All-New Trajectory FIFA 22's new Trajectory Control (Trajec) takes the ball traveling physics engine to the next level. Trajec allows for greater control of the ball to make players use their dribbling skills

FIFA is one of the world's most popular sports video games. EA SPORTS FIFA puts you in control of your favourite club, competing against other teams across multiple game modes, leagues and seasons. FIFA continues to redefine what sports video games can be, responding to player feedback and delivering features that genuinely enhance the experience. MAKE THE MOST OF EVERY SINGLE MOMENT Gameplay intelligence, natural intelligence, instincts - we are laser-focused on making you the greatest FIFA player ever. Make decisions that impact your game and team, from tactical placement to the type of ball to play, to making the next pass, the shot or the tackle. **AVOID THE 'CLICHS' THAT WOUNDED YOUR RIVALS** Effective and tactical decisions will naturally bring you closer to victory than reckless play. Every tackle is critical to win and losing the ball in key situations is an all too common problem. Despite being a match for life, your team remains under pressure when you lose possession, and when you commit fouls you'll find your team under even greater pressure. Take your chance to recover possession, but be careful not to become a 'cliché' penalty box target. **COMPETE AGAINST YOUR FRIENDS AND CLUB MATES** Just one match isn't enough - compete in online multiplayer and play a truly global brand of football with up to 64 players on the pitch. Play against friends, plus your favourite footballing peers including Cristiano Ronaldo, Lionel Messi, Neymar, Eden Hazard and more - and with pro licenses included for all top national teams and club teams, there's plenty of content to choose from. Compete in the FIFA Ultimate Team™ mode and build your dream team. Play with the biggest stars, including all 11 current men's and women's World Cup teams. **EA SPORTS FIFA 22 TEKNIC SEASON IN LOWLIGHT** If you're not having fun, it's all downhill from here. It can all change in a split second. The quick turnaround of the UEFA Champions League and Europa League this season provides a dramatic visual test for gameplay intelligence. **Slow and simple decisions that take time can make all the difference. CREATE THE MOST AMAZING BACKGROUNDS** As the seasons progress, the stadiums and grass grow

What's new:

- **PLAYER MOTION-CAMUTATION TECHNOLOGY:** Future Watch the evolution of the footballing world at the highest level, with FIFA 22's new technology combining real player movement with motion-capture data to create an authentic, detailed and lifelike gameplay experience. FIFA 22 delivers the highest-energy gameplay to date, with the players on the pitch reacting in real-time to the subtle movements of the ball. And in pursuit of this approach, Caltra and Play3motion captured the movements of 22 real-life footballers at a full-intensity, 60 minutes match and applied this data to the game allowing for each player to react dynamically and realistically to the ball. FIFA 22 will deliver the best player animation technology to date. In order to achieve this, FIFA 22 uses unprecedented motion capture technology that captures the movements and interactions of three-dimensional human motion.
- **Ultimate Team mode** of FIFA for the FIFA eFanSports Division to enjoy. It lets you play in Ultimate Team Mode against your friends. It's a quick and addictive way to pass the time and we've provided you with the first two seasons to allow you to get on and experience football gaming, in all its glory.
