pertains to the field of vehicle occupant restraint  
systems and, more particularly, to an inflator  
assembly for an occupant restraint system which  
includes a pyrotechnic charge and an  
overmolded pressure vessel in which the  
pyrotechnic charge is located, and in which the  
pyrotechnic charge and the overmolded pressure

vessel are hermetically sealed. At least one form of vehicle occupant restraint system includes a pyrotechnic charge which is adapted to produce a gas on receipt of an electric signal to actuate the inflator assembly which, in turn, provides a gas flow to an inflatable restraint device. In such systems it is important to hermetically seal the pyrotechnic charge and the inflatable restraint device, i.e., the inflator assembly, in order to prevent moisture which might be introduced into the restraint system from affecting the operation thereof. Further, it is important to hermetically seal the pyrotechnic charge with the inflatable restraint device to prevent the pyrotechnic charge from burning off due to the heat produced during operation of the inflator assembly. A typical prior art device for hermetically sealing a pyrotechnic charge is an hermetically sealed gas generator which is positioned within the inflator assembly

## **What's new:**

**Download: Explore the Lands Between!!!** This article is going to be short and sweet since I have to fill a gap, but I find I can say the most interesting things about sexuality in video games with a little explanation. First of all, I would like to apologise to anyone that has been watching my Youtube videos lately since there won't be one until a few days from now. Today's topic is particularly interesting to me so I hope you won't mind being treated to the juicy details. In AA I believe there is something called Hysteria. Hysteria can affect multiple players in a multiplayer game and take the form of extreme aggression against other players. The only person aware that it is Hysteria at the time is the person that caused it since Hysteria doesn't affect the recipient of the aggression. However after the person afflicted realizes what has happened and where Hysteria originates it may not be possible for them to control their body properly due to the fact that they can't keep the information inside anymore. At that point the Hysteria spread and will eventually require the entire team to take part in the battle in order to successfully return to playable status. So, as of right now all I can say about it is that I have an exclusive tid
