AutoCAD uses a graphical interface for the design process. As a result, creating a design in AutoCAD requires a high level of precision, making it especially challenging for novices. The toolset used to create a design in AutoCAD is powerful but demanding. The mobile app provides a subset of AutoCAD's functionality in a simple, easy-to-use format. That means we can enhance AutoCAD's user experience without bringing any of AutoCAD's more complex features and complexities to the mobile app. If you are planning to design on a desktop with AutoCAD or you are working in AutoCAD already, we would encourage you to download the mobile app. DesignMobile is available for iPhone and iPad devices. Autodesk's design, engineering, and manufacturing customers have been using DesignMobile for the past year to create 2D and 3D designs in AutoCAD. The mobile app also provides the tools necessary to meet the demands of mobile CAD users today: • The ability to create, view, and send designs to AutoCAD • Virtual folders for Organizing documents • An easy-to-use zoom and scroll system • Supports multi-user access If you are a mobile CAD user, please visit our AutoCAD Product page to learn more about DesignMobile, AutoCAD's mobile app. Design
