If you are the copyright holder and believe your work has been used.Q: possible characters for Html.BeginForm in MVC 4 After having read this article I saw that I can use HTML5 to submit my form. But I can't change my form like this so I need an other solution. So for a form like this what can I put instead of data-ajax="true" data-ajax-method="POST" data-ajax-mode="replace" data-ajax-update="#div\_identifier" A: You can use an input type="hidden" element to generate your form. This will generate the same DOM structure that you had before but it will be hidden. Q: Redirect to shared url from an embedded fb within iframe I have an iframe application hosted on a mobile app platform (learnpress), and I need to redirect the iframe to a shared url on my facebook profile (for the purposes of doing something to that shared url from within the facebook app that lives within the iframe). I have the shared url from the iframe domain in the \$\_SERVER global variable, but if I try to redirect to it within the iframe, it returns nothing and redirects to the iframe origin. Is there a way to force facebook to treat this as an externally hosted domain,
